Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/580,211	Applicant(s) TSUCHIYAMA ET AL.	
	Examiner JEREMY R. SEVERSON	Art Unit 3653	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

Figures 5 and 6 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Murayoshi (US 4,674,737).

Re claim 1, Murayoshi discloses an automatic paper feeder supplying paper to an apparatus such as a printer or a scanner, comprising: a separation pad 13, pressing the paper against a pick roller 12 so as to feed the paper one by one; and pad pressing means 14, applying pressure to the separation pad so as to press the separation pad against a surface of the pick roller, wherein the pad pressing means is formed in a

Art Unit: 3653

reverse U-shape so that the separation pad is arranged such as to be pressed at two front and rear portions thereof against the surface of the pick roller, and wherein the pad pressing means is structured to be rotatable back and forth with respect to a rotating direction of the pick roller about a fulcrum 552 where pressure is applied to the pad pressing means. See fig. 12 and col. 17, lines 63 et seq.

Re claim 2, Murayoshi discloses the automatic paper feeder according to claim 1, further comprising: a rotating arm arranged so that the entire pad pressing means is rotatable about a predetermined position.

FIG. 12

Re claim 3, Murayoshi discloses the automatic paper feeder according to claim 1 or 2, wherein the fulcrum where the pressure is applied to the pad pressing means is arranged such as to be movable back and forth depending on a type of paper which is fed. The movement of bracket 550 causes movement of fulcrum 552. See col. 18, lines 3-7.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
